Correct...nothing upstream of discharge that we could find.

Fish and Game may want you to fill out a data collection form. It's a pretty easy process. You can email Carol Henderson at Carol.Henderson@wildlife.nh.gov. Tell her I have one for the study....see if you can be covered under it, or if you need your own.

Hey Amy-

Checked out the data. Don't see any data for stations upstream of the discharge. Does that mean there were no clams collected there?

Also, I was thinking of dropping a 1/16<sup>th</sup> m<sup>2</sup> quadrat in a couple spots during our dives to get another sense of densities. Do I need state approval to collect clams?

Would that data interest you? Is there anything else we can collect for you when we're there?

Eric

Eric,

We haven't delved into the measuring/counting of clams yet from our sampling last week, but attached is a spreadsheet showing the locations where clams were collected in our dredge sampling last week. Hopefully this helps you identify sites for dives next week.

Amy
